### **About ImageneBio, Inc.**

[Imagene](#) is a clinical-stage biotechnology company dedicated to developing therapeutics for patients with immunological, autoimmune and inflammatory diseases with differentiated clinical profiles. The Company's program, IMG-007, is a receptor targeting, non-T cell-depleting, ADCC-silenced, anti-OX40 monoclonal antibody with an approximately 5-week half-life. Imagene is currently conducting a Phase 2b clinical trial of IMG-007 in patients with moderate-to-severe atopic dermatitis. The Company has also completed a proof-of-concept trial and plans to initiate a Phase 2 study in alopecia areata.
